ELIPSIS3000

**BaBylissPRO®**

## Ultra light & ultra efficient

2100W

490g

Long-life AC motor

Air speed: 130km/h

## Flexibility & control

6 heat and speed settings

Cold air switch for perfect hold and long-lasting results

Two narrow concentrator nozzles 6 mm x 75 mm and 6 mm x 90 mm for more versatility while styling.

## Hair care

A central ionic generator allows an in-depth action of the millions of negative ions generated and decreases tension due to static electricity at the surface of the hair

Thanks to the ionic technology hair gets smooth, shiny and much easier to disentangle and style.

## Comfort & balance

Azzurro's lightweight and ideal balance make it perfect for the salon and help relieve muscular tensions in the forearm in order to fight repetitive strain injuries and occupational diseases.

A powerful 2100W made in Italy professional dryer with a beautiful finish that features a long-life AC motor for outstanding air speed and fast drying results.

Ionic technology leaves hair with a smooth, shiny and frizz-free finish.

Its superior build quality with a smart, streamlined design for comfortable handling and maximum control ensures this new dryer truly delivers top professional performance and style.

## Features:

- Powerful: 2100W
- Long-life AC motor
- Air speed: 130km/h
- Lightweight: 490g
- Ionic technology
- Narrow concentrator nozzles (6 mm x 75 mm and 6 mm x 90 mm) with venturi action : **+20% power**
- Removable rear filter for easy and quick cleaning
- 2.70m professional power cord

MADE IN ITALY

# INNOVATION

## Thanks to SUS304 stainless steel

A stainless steel construction that boasts a combination of lightness, ergonomics and extreme resistance to corrosion and to the warping that can result from high temperatures. This warp-free construction ensures the plates remain perfectly parallel, constant over time, and thus ensures the same alignment in relation to the hair when straightening.

## Thanks to EP TECHNOLOGY 5.0

A metal particle coating created using the same electro-galvanising process as is used in jewellery-making generates even less friction and so the plates are even smoother. These plates contain no chemical agents and so ensure an even greater resistance to high temperatures and even more homogeneous heat over their entire surface.

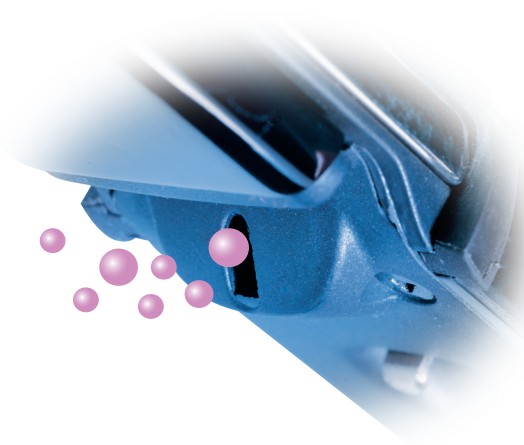

## Thanks to a rounded design

Its exclusive convex design and its ultra-sleek chrome surface make it ideal for straightening and curling hair.

Its dual function lets you use it in exactly the same way as you would use curling tongs thanks to its built-in locking system and its outer elliptical form heated by thermal conduction.

# PERFECTION

## Thanks to IonMultiplier technology

**ELIPSIS3000** has the latest generation of ion generator offering a greater concentration of ions for softer, silkier and shinier hair.

**ELIPSIS3000** is a hair care booster and improves the beauty of the hair.

# EASE AND SAFETY

## Thanks to FullWave Thermal Science technology

A high density dual ceramic heating element for even more power making the **ELIPSIS3000** 20% faster than the best professional stylers. This heating element also provides exceptional heat distribution over the entire surface of the plates, and instant heat recovery to maintain constant temperature.

With 5 temperature settings ranging from 150°C to 230°C, it is suitable for all hair types, even the most difficult, as well as in technical treatments (technical and keratin straightening).

## Thanks to extraordinary plates

- **Over 34 cm<sup>2</sup> straightening surface area, that is to say over 60% compared to other professional straighteners.**

**ELIPSIS3000**'s wider and longer plates make easier and faster to straighten, thereby saving the hairstylist time and energy.

- **Floating plates**

Like cushions, they shape themselves to the hair perfectly and hold it firmly throughout the straightening session without having to grip the hair too tightly so it's more comfortable to use and it creates less tension in the wrist and hand.

## Thanks to advanced materials

In addition to its SUS304 build, the **ELIPSIS3000** also comprises, in key places, Ryton and silicone, insulating materials that are highly resistant to heat. The styler comes with a glove that protects the fingers from heat and a silicone insulating mat.

# CREATION

Yes!

Yes!

Yes!

Yes!

Because:

It's not necessary to adjust **ELIPSIS3000's** temperature to the highest setting.

It's not necessary to grip **ELIPSIS3000** too tightly so that it holds the hair perfectly.

**ELIPSIS3000** can be used for purposes other than straightening and creating volume.

**ELIPSIS3000** can create many kinds of straightening and curling.

## Yes! It's all possible

**ELIPSIS3000's** high performance level guarantees the temperature is kept constant and the heat perfectly even over the entire surface of the plates. Its floating plates shape themselves perfectly to the hair and result in a perfect straightening that lasts until the next time hair is washed.

Because of its design, it can get closer to the roots of the hair and lift it to give it more volume.

Its rounded shape lets one create perfect curls and a multitude of different styles.

**ELIPSIS3000** offers infinite opportunities for use and creations

STRAIGHT AND SLEEK

ELEGANT WAVE

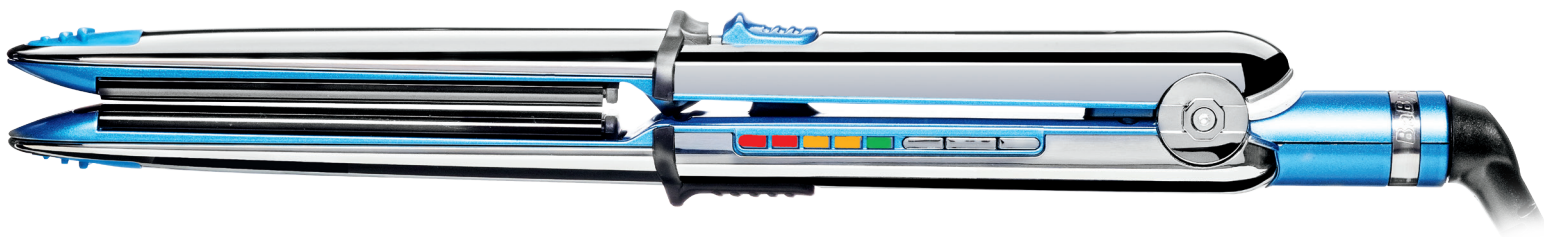

VOLUPTUOUS CURLS

Features at the cutting edge of technology make **ELIPSIS3000** an exceptional luxury tool.

- EP TECHNOLOGY 5.0
- FullWave Thermal Science
- IonMultiplier Technology
- 20% faster
- Advanced materials

**ELIPSIS3000** redefines ease of use, multi-function, versatility and excellence in performance.
