

# EP TECHNOLOGY 5.0 38mm crimping iron

Creates a defined crimped pattern for added volume  
Gives style and long-lasting texture in the hair  
100% contact with hair thanks to the floating plates

## EP TECHNOLOGY 5.0

This is a very technical process similar to what is done in jewelry. Its achievement lasts a long time as this is about getting a layer of micrometric metallic particles by electroplating.

- ▶ no friction for even more smoothness
- ▶ no chemical agents for better resistance to high-heat
- ▶ even heat distribution all through the plates

For plates:

1. 3 x harder & longer lasting\*
2. 3 x smoother
3. hard-wearing to chemicals
4. lasting & perfect result
5. hair respected & sublimated

For perfect, long-lasting results:

- preserves the integrity of the hair
- hair is soft and shiny
- even heat distribution makes faster styling results that last longer

For intensive professional use:

- perfect resistance to wear-out, chemical products and high-heat
- even smoother plates
- time and energy savings

## Advanced Heat Management™ system

The crimper integrates the latest self-regulating heating element, the Advanced Heat Management™, which gives accurate and continuous electronic control of the temperature. Because of this technology, the unit offers immediate heat-up, a very high temperature, temperature stability to the nearest half degree and very quick reaction and recovery times.

## Perfect results

Even heat distribution all through the plates

Floating plates to absorb perfectly the pressure on the section and thus a perfectly even pressure. Regardless of how irregular the thickness of the section of hair, the pressure used will be the same over the entire length

- ▶ a perfectly even pressure plus an even heat distribution all through the plates ensure perfectly defined and even results

\* Compared to Nanotitanium sol-Gel plates

## Universal device

The 38mm wide plates allow use on any length of hair, from medium-length to long one whereas the temperature control lets it to be used on any type of hair from the most fragile to the most difficult one, from the thinnest to the coarsest one.  
Universal voltage for worldwide styling

## Safety & energy saving

Locking system

- ▶ even faster heat-up
- ▶ optimum closing and security

Insulated multi-layer heat-resistant mat

- ▶ during use, always let the unit rest on the insulated mat to protect your surfaces

Ecofriendly

- ▶ 50W

## Features

- EP TECHNOLOGY 38mm floating plates
- Advanced Heat Management System™: immediate heat-up
- Temperature selector – 5 settings (**150°C-170°C-190°C-205°C-230°C**)
- Locking system to store the unit easily and better protection for the plates
- On/off switch & indicator light
- Professional 2.70m swivel cord
- Insulated, multi-layer, heat-resistant mat
