

FX3

HIGH PERFORMANCE & HIGH TORQUE PROFESSIONAL GROOMING TOOLS

BaBylissPRO is a technological company always inventing and tailoring new tools to meet the needs of any hairstyling or barbering professionals.

Each new product development involves our best engineers, the resources within our best production plants, and finally dozens of professionals who test and share their insights to improve the products as their developments go along.

Now close your eyes and imagine yourself driving a sports car. Speed astonishes you and time flies very fast.

It is this same feeling that you will experience with the **FX3** series of BaBylissPRO.

Because it is this same feeling that hundreds of hairdressing and beard professionals, FX3 convinced users, around the world have shared with us: having a FX3 in your hands makes you feel like having a sports car in hands.

Like sports car, they are slim, very aggressive but in a good way, very powerful, as sharp as hell, compact and light, with a beautiful design which is called the "European feel" in the USA.

The **FX3** have a streamlined design to blend into the hand, a very ergonomic shape perfectly adapted to the details of the hand.

Ideal for barbers as well as for hair stylists who have set up a barber corner in their hair salon and wish transition and mixed tools.

They are the perfect tools for the professionals who are soft and love letting the tools work, knowing that these tools will do the work.

FX3 HIGH PERFORMANCE & HIGH TORQUE CLIPPER

More ergonomic and comfortable in your hands than any other clipper of its category with a little groove under the blade for your finger and a thumb rest located on the front of the clipper.

5 locking detents to set the cutting height with a push-button (also acting as thumb-rest) for easy operation.

If you push the power button all the way down it's the off position. As you go up, this is first going to be your 6 000 rpm speed and the next level up your 7 000 rpm speed. **But why would you use one over the other?**

- when you use the slower speed, the **6 000 rpm**, it is going to be more for your fading because it will not be cutting too quickly. It is slower and you will do a nice, slower cut.
- **7 000 rpm** speed will cut faster and will make sure that it will go right into any type of hair texture and remove bulk.

4 LED battery indicator lights

It will give you how much battery is left, so you always know when charging gets necessary: 75% - 50% - 25% - 0%.

Serrated Titanium fade blade

This blade is really great for fading and it is similar to a flat fade blade. With its **steeper angle**, and its high precision, it is perfect for barbers and stylists who don't want to tap but to punch the lines. The **FX3** will give you more punching sensations.

Zero-gapping is very easy.

As good on dry hair as on wet hair.

Incredible run time

On a 5-hour charge time, this clipper has a **5-hour run time**, which is incredible, especially if you build good habits and turn your clipper on and off in between you are not using it in order to save its power.

Guards' system

An additional contact point under the guards has been designed for more holding. Also, little hooks have been added on their sides which allow them to stay on and to clip on even better.

The **FX3** guards are a **little flatter** than the other ones and have a **slimmer ridge**.

> so, when you are fine-tuning and detailing, you will find yourself loving the tightness of the blade.

> you will be sure that your guard will not be falling off when you will be going fast through the hair during the haircut.

High performance & high torque digital motor

- **6 000rpm & 7 000rpm** with constant speed tech

> stays at constant speed for full 5 hours of cordless runtime

> outstanding cutting performance

Lithium-polymer battery - cord/cordless operation

- Up to 5 hours of cordless runtime reached on a 5-hour charge time

Low vibration

The lower vibration of the clipper allows the muscles of your hand to be less tired or stressed-out at the end of the day.

Hanging strap

Two different size hooks (one small and one super wide) are provided which are good for storage on your working station if you want to hang your clipper. It's also an additional grip provided to make you feel more secure.

FX3 HIGH PERFORMANCE & HIGH TORQUE TRIMMER

Just like the metal SkeletonFX, the FX3 trimmer has a 360° exposed blade, and its body is similar to the cut-off body everybody loves that allows you to have that free space to really get into the tight space around your client's facial hairs.

360° exposed Titanium T-blade

The FX3 has a higher angle up with an **increase of 15% on the blade angle.**

When you are using a trimmer for a line-up, if you are flat to your client's head, you will notice that other trimmers are diving down a little bit and it is not going to be a normal position for you.

Because the FX3 has a higher angle up, as you do it in the same position, what is really good about that is that you will have a **much more leveled blade.**

So, this means that when you are doing edges, the blade is going to lay flat exactly where you zero-gapped it. **That angle is just a lot more natural.**

It is a small feature, but which makes a huge difference. It makes edging easy and quick.

Very long run time

On a 4-hour charge time, this trimmer has a 4-hour run time, which is a lot, especially if you build good habits and turn your trimmer on and off in between you are not using it to save its power.

High performance & high torque digital motor

- **7200 rpm** with constant speed tech
- > stays at constant speed for full 4 hours of cordless runtime
- > outstanding cutting performance

4 LED battery indicator lights

It will give you how much battery is left, so you always know when charging gets necessary: 75% - 50% - 25% - 0%.

Lithium-polymer battery - cord/cordless operation

- Up to 4 hours of cordless runtime reached on a 4-hour charge time

Low vibration

The lower vibration of the trimmer allows the muscles of your hand to be less tired or stressed-out at the end of the day.

Hanging strap

Two different-size hooks (one small and one super wide) are provided which are good for storage on your working station if you want to hang your trimmer. It's also an additional grip provided to make you feel more secure.

FX3 HIGH PERFORMANCE DOUBLE FOIL SHAVER

Many barbers have voted the FX3 shaver the best shaver in the industry.

High-speed rotary motor

Very powerful and very fast foil shaver thanks to an ultra-fast DC motor, **10 000 rpm.**

Offset double foil system

Hypoallergenic gold Titanium foil. Ultra-thin staggered double foil head provides the perfect cut in "hugging" the contour of the head or the face.

Lightweight

Half the weight of our metal shavers.

4 LED battery indicator lights

It will give you how much battery is left, so you always know when charging gets necessary: 75% - 50% - 25% - 0%.

Lithium-ion battery - cord/cordless operation

• Up to 3 hours of cordless runtime reached on a 3-hour charge time

Automatic shut-off

Another cool feature is the automatic shut-off cap you can put on in any direction and it turns off the same way.

Easy cleaning & maintenance

A button allows you to pop the top off to clean the inside very easily.

Hanging strap

Hanging hooks are provided which are good for storage on your working station if you wish to hang your shaver. It's also an additional grip provided to make you feel more secure.

The **FX3** shaver has been designed to achieve perfect trims and shades, becoming the perfect tools for extra-close shaves, for cleaning hairline and offer clean, net results.

Its ultra-thin floating foil system delivers a safe, close shave without irritating the skin. It is very comfortable to use thanks to its perfectly balanced design and lightweight.

Perfect for stubbles, fly-aways, stray hairs. Just put the shaver on the head or face and it will do the job.

The **FX3** series has a dual voltage. So, if you are a traveler or are working anywhere mobile, this is a pretty cool feature that will make your work much easier.

With the **FX3** clipper, you will create length and shapes.

With the **FX3** trimmer, you will do edging and balding.

With the **FX3** shaver, you will shave, cut stubbles and remove fly-aways.

None of our grooming series replace the others. We are just offering different options to barbers and stylists. The **FX3** series is about giving professionals different options.

It is about giving them sharp and fast tools in a good way, with premium look and premium feel.

Make the most of your **FX3** and share your creations!
