

SNAPFX

PROFESSIONAL CLIPPER & OUTLINING TRIMMER SNAP IN/SNAP OUT - DUAL LITHIUM BATTERY SYSTEM

SNAPFX, the revolutionary power system that keeps going as long as you do!

You don't quit. Neither should your tools. Neither do the SNAPFX providing you unlimited cordless runtime.

For the first time ever, the power of UNLIMITED cordless runtime is in your hands with our industry-first dual battery system.

Effortlessly snap in / snap out the high-capacity battery cartridges while you work.

Charge one cartridge while using the other, enabling you to cut for as long as you want, client after client.

UNLIMITED CORDLESS RUNTIME

And not only... there are a lot of key features in the SNAPFX which solve many problems faced by barbers & hairstylists.

SNAP IN/SNAP OUT dual Lithium battery system

Thanks to the set of 2 x 30% higher capacity batteries and the double charger, as soon as one battery is empty, you take it out, put the next battery in and put the one that just ran out in the charging stand. So that it is always charging while you are working.

This system is also perfect for doing house calls or for barbers travelling to trade shows who don't always have a plug nearby or are travelling abroad; they just need to have battery packs ready to go, fully charged. Universal voltage allows them to travel the world with their tools.

www.babylisspro.eu

Each battery is 2-hour runtime.
Both batteries charge together in 3 hours.
1 battery in the charger will charge in 2 hours.

All batteries include a detent hanging hook.

You get an infinite lifespan, infinite charging

LED ring light battery indicator

You will get huge fan of the LED ring lights all the way around because you will always know how much power you have left:

- When the battery is full, the LED ring is blue
- When the battery is low, the LED ring is flashing blue
- When battery is critically low (less than 15 minutes runtime left), the LED ring is flashing red

SNAPON / SNAP OFF self-aligning magnetic hair pocket cover

We have designed this new cool system: there is no need any more to remove the blade to clean. Both clipper and trimmer have this little magnetic lid that comes off and allows you to clean out the unit and the internals without having to take the blade off. Quick & easy cleaning – no tools needed.

*Cleaning and zero-gapping have become easier,
especially for junior-level barbers*

GENUINE CUTTING SYSTEM

Premium quality blades

The SNAPFX are provided with Black Diamond Like Carbon blades.

With these **DLC** blades, you get a different feeling while cutting. It feels crispier and sharper. A fade blade on the clipper, a deep-tooth T-blade on the trimmer, both zero-gap adjustable.

Thanks to the magnetic lid, the trimmer's 360° exposed T-blade is even more exposed, and zero-gapping is even easier.

Clipper's premium quality guards

Another cool feature of the clipper is the premium guards. The SNAPFX clipper has the full set of 8 premium clipper guards:

N° 0.5	1.5 mm	• fiberglass reinforced for strength and durability
N° 1	3 mm	• with metal clips to firmly secure the clipper guards onto blade
N° 1.5	4.8 mm	
N° 2	6 mm	• optimized number and length of teeth to gain in precision for a cleaner cut
N° 3	10 mm	
N° 4	13 mm	
N° 5	16 mm	
N° 6	19 mm	

5-detent locking taper control

Barbers and stylists can work methodically through the haircut and be precise when changing the cutting height. This feature allows you to be more successful when cutting hair. Instead of free-flowing taper, BaBylissPRO is the only one to really do this 5-detent system (0.8 – 1.4 – 2 – 2.8 – 3.5mm).

You will never fall short of precision and cutting performance

New high-torque, high-performance digital motors

Digital motors are the best motors ever.

The SNAPFX are provided with the last generation of digital motors, even faster and even more reliable, delivering constant speed tech.

Clipper: 6 800 rpm

Trimmer: 7 200 rpm

Perfect premium design and balance

Robust all-metal housing design engineered for total professional reliability and uncompromising integrity. Knurled barbell grip for perfect control in hand.

"When I travelled to trade shows, I had to bring 2 or 3 sets of tools to not have to recharge. With the SNAPFX, I can actually travel with only one set (one clipper and one trimmer) and to have the batteries in my bag. And that's it!" - **SOFIE POK @staygold.la**
