Thanks to **ELIPSTYLE**, you will **ENHANCE**

Hair care and beauty booster, **ELIPSTYLE** is provided with a real high capacity ion generator which offers a greater ion concentration to create smoother, softer and shinier hair.

▶ **Thanks to IonMultiplier technology you will change any kind of hair into a beautiful, shiny texture.**

Titanium plates give outstanding heat transfer into the hair so that you can still get great results at a lower temperature.

▶ **You will get perfect results, at all times, on any hair type.**

▶ **You will achieve perfect technical straightening services.**

Thanks to **ELIPSTYLE**'s power, hair cuticles will be perfectly sealed and will create a barrier that helps seal out humidity and combat frizz.

▶ **This results in a perfect straightening or curling that lasts until the next time hair is washed.**

Thanks to **ELIPSTYLE**, you will **BREAK NEW GROUNDS**

ELIPSTYLE's construction boasts a combination of lightness, ergonomics and extreme resistance to corrosion and to the warping that can result from high temperatures. This warp-free construction ensures the plates remain perfectly parallel, constant over time, and thus ensures the same alignment in relation to the hair when straightening.

▶ **You will keep your **ELIPSTYLE** in good condition for a very long time.**

Its exclusive convex design and its ultra-sleek chrome surface make it ideal for straightening and curling hair.

Its dual function lets you use it in exactly the same way as you would use curling tongs thanks to its built-in locking system and its outer elliptical form heated by thermal conduction.

ELIPSTYLE's floating plates shape themselves to the hair perfectly and hold it firmly throughout the straightening session without having to grip the hair too tightly. Work gets more comfortable and creates less tension in your wrist and hand.

▶ **You now have a all-in-one tool that will offer you infinite opportunities for use and will boost your creativity.**

Thanks to **ELIPSTYLE**, you will work **QUICKLY**.

FullWave Thermal Science: a high density dual ceramic heating element that gives more power, makes **ELIPSTYLE** 20% faster than the best professional stylers.

This heating element also gives exceptional heat distribution over the entire surface of the plates and provides instant heat recovery to maintain constant temperature.

► **You will get the desired result in only one stroke. You will not only save time but also preserve your clients' hair fiber.**

Temperature control from 150°C to 230°C allows use on any type of hair even the most coarsest one. **ELIPSTYLE** is also the perfect tool for technical services (keratin straightening, Brazilian straightening...)

Thanks to **ELIPSTYLE**, you will work **SAFELY**

In addition to its SUS304 construction, **ELIPSTYLE** also comprises, in key places, silicone at the junction between the heating parts at the front of the unit and the rear handle and Ryton. Both the silicone and Ryton are insulating materials that are highly resistant to heat. The styler comes with a glove that protects your hand from heat and a heatproof pouch to store it safely.

ELIPSTYLE is a styler that makes a difference.

Its premium performance level guarantees the temperature is kept constant and the heat perfectly even over the entire surface of the plates.

Its floating plates shape themselves perfectly to the hair and result in a perfect straightening that lasts until the next time hair is washed.

Because of its design, it can get closer to the roots of the hair and lift it to give it more volume.

Its rounded shape lets one create perfect curls and a multitude of different styles.

► **Perfect straightening, waves, curls, ELIPSTYLE makes everything possible.**

This tool is a real creativity booster.
